Therefore, it is proposed to procure new FRS machines with a minimum user capacity of 10,000, ensuring complete compatibility with the existing server application and data. 2. The compatibility of a newly supplied FRS machine with the existing Timewatch FRS machines and server application is necessary. The proposed FRS machine must be fully compatible with the existing Timewatch FRS infrastructure, including data synchronization and server integration, to ensure seamless operation without requiring any modification or replacement of the existing system. 3. Therefore it is recommended to proceed with procurement of the Timewatch FRS.</p> |
