

# Thermal Cycling Chamber

---

**Manufacturer:** CME Bangalore

**Model:** PAC 120

**Scope of the Equipment:** It is a testing device used to expose materials or products to rapid and repeated cycles of high and low temperatures

**Application:** Evaluating the ability of a material to withstand the thermal stress and identify potential failures related to thermal fatigue

## Technical Details:

<b>Dimension (W X D X H)</b>	<b>500 x 400 x 600 (mm)</b>
<b>Test Space Volume</b>	120 / 4.2 (Ltr / Cuft)
<b>Temperature Range</b>	- 40 to +180°C
<b>Ramp rate</b>	3/5/6/7 as per IEC 60068-3-5
