

When we join a college we all wish there was someone who could show us around the campus, guide us in academics and tell us about various extracurricular activities in the college. This is precisely what mentorship program is there for.

As a part of Orientation, freshers will be allotted Mentors, who are the current second year students of respective departments. The mentors will guide the students in all aspects of their college life, clear their academic and non-academic doubts and also take into account the interests of their mentees helping them to get a strong foothold in the college. Apart from the Mentors, the Peer Supporters will always be available to clear the doubts of parents and students alike.
